Crane Systems

CMAK Crane Systems is an expert engineering and manufacturing company focusing on high quality electric crane components.

We reach customers worldwide, through the partners thanks to our affordable products that are produced in one of the most modern production facilities. In addition to our crane systems that are produced with the world's leading technologies, we offer traditions, business ethics and our engineering success to the customers.

We do meet the needs of the market in standard capacity cranes with FEM class, in addition to that, we manufacture high capacity cranes with custom designs.

With continuous research and development, we've formed an ergonomic design which leads easy maintenance and minimum service requirement.

Our Story

Founded in 1977

vast knowledge in industrial cranes and material handling applications

Family Business

laws on continuity and integrity

corporate culture

emphasises strictly on business ethics, and long-term business success

Our core strengths come from engineering with scientific R&D

Smart DeSing

Focus solely on high quality production with smart desing

INDUSTRIES

- Metals Production
- Power
- General Manufacturing
- Warehouses
- Mining
- Petroleum and Gas
- Paper and Forest
- Shipyards
- Container Handling
- Waste Management
- Automotive
- Workshops

JIB CRANE

- Floor-mounted turning angle JIB cranes [360° rotation capability]
- Console (Wall running) JIB cranes
- Wall-mounted turning angle JIB cranes [180° rotation capability]
- Column mounted turning angle JIB cranes [between 180° -270° rotation capability]

- CMAK JIB cranes increase the production speed of your business and reduce the workload of the larger cranes while performing material handling and placement processes with high efficiency in their locations.
- JIB cranes especially provide the optimum solution for an array of workstations that are lined side by side.
- Higher efficiency when used at narrow spaces or around any machine.
- JIB cranes, used for reducing workloads of the overhead cranes at narrow spaces of the production site, are suitable for carrying capacities from 250kg up to 5000kg.
